- 12> Supposedly, in taste tests with Papua New Guinea cannibals, which Hormel Foods luncheon meat tasted most like human flesh?
- 13> Two religious dentists were pioneers in marketing what pasteurized fruit

juice, which they called "unfermented Communion wine"?

14> In 1974, in Troy, Ohio, what was the first product to be scanned by a UPC scanner?

15> Crunching what flavor Life Saver in the dark will produce visible ultraviolet sparks?

### **Answers:**

1> Snickers - It is a hit in movie theatres.

2> Baskin-Robbins - It originally picked '31 flavors' so you could have a new one every day of the month.

3> Chicken - It was originally made from lamb. Hindus, naturally enough, won't eat beef, and Muslims won't eat pork.

4> Taco Bell - Mir missed the 144-square-metre vinyl target 15 km off the coast of Australia.

5> Cheesecake - Lubin and his brother-in-law had bought a small chain of neighborhood bakeries called Community Bake Shops.

6> 7Up - The drug is now used to treat depression.

7> Red - Red dye amaranth (FDC Red #2) was not used in M and Ms.

8> Coca-Cola - It was such a total fiasco that some people think the company did it on purpose.

9> Wendy's - He also became a champion for adoptions, having been adopted himself.

10> Kentucky Fried Chicken - Harlan Sanders struggled for years to make a living.

11> Chewing gum - It soon became his main business.

12> Spam - Oddly, Hormel does not use this fact in its ads.

13> Grape juice - Thomas and Charles Welch became active in the prohibition movement.

14> Wrigley's Juicy Fruit - On June 26, 1974, cashier Sharon Buchanan rang up Clyde Dawson's purchase, but the gum ended up at the Smithsonian's National Museum of American History.

15> Wintergreen - Sugar is a near-perfect crystal, full of empty space and closely locked atoms. Bust it up and the electrons fly, colliding into nitrogen in the air and making teeny tiny lightning. (Wintergreen contains fluorescent methyl salicylate, which absorbs UV light.)
